Unleash Your Creativity

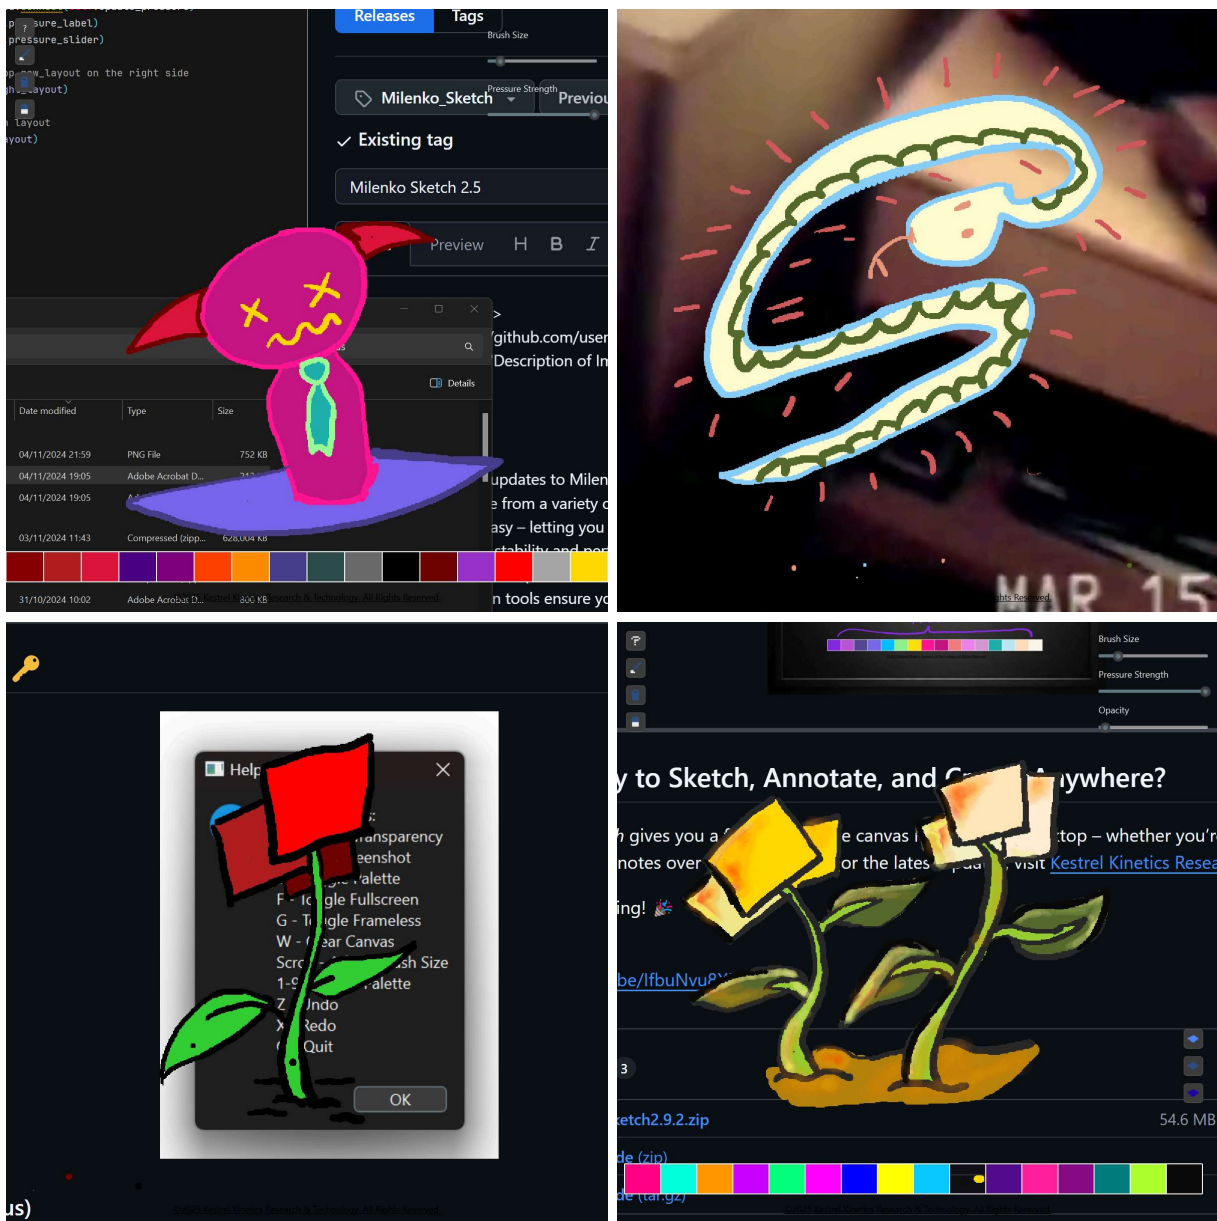

Milenko Sketch 2 is a versatile digital sketching and annotation tool designed for artists, note-takers, and creative enthusiasts. With stylus and mouse support, new colour palettes, improved brush handling, and transparent overlay options, Milenko Sketch offers a seamless experience for any creative project.

🔑 Key Features & Controls 🔑

🖌️ Draw & Adjust (Mouse or Stylus)

- **Left Click or Stylus Tap** – Start sketching with the selected colour and brush size!
- **Pressure Sensitivity** – If you're using a stylus, *Milenko Sketch* gives you natural control over line thickness. Mouse users can adjust the pressure manually with the slider.
- **Scroll Wheel or Stylus Buttons** – Instantly adjust brush size as you go; scroll up (or press up button) to increase, and down to decrease.

Colour Customisation

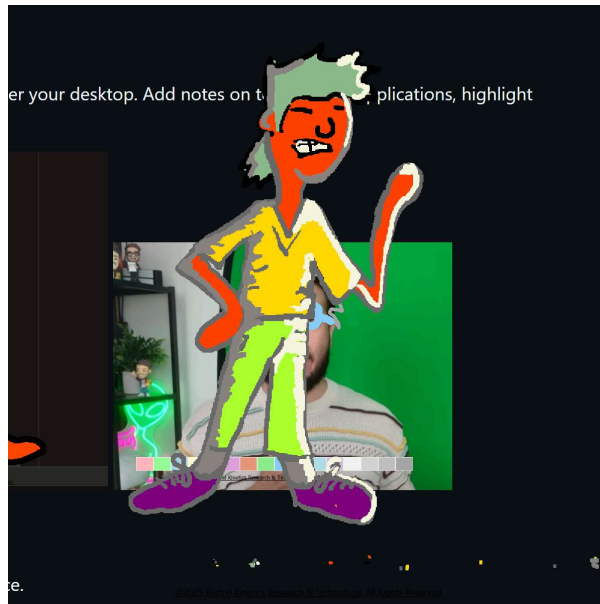

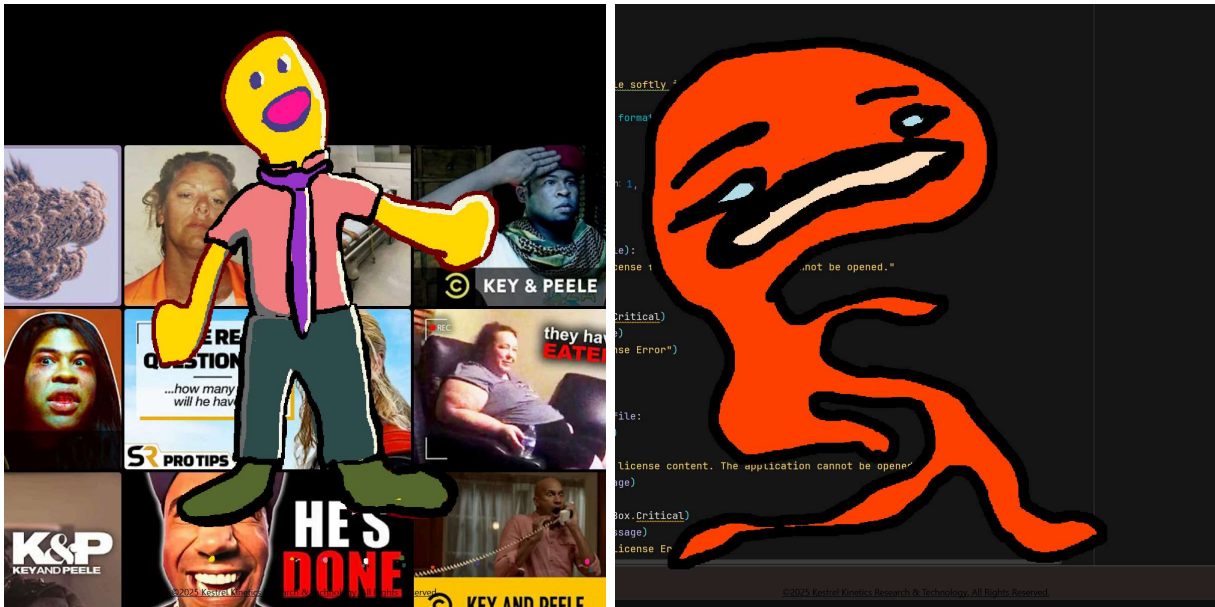

Palette Selection: Choose from a range of beautiful colour palettes – including Pastel, Neon, Earthy, Cyberpunk, and more – to perfectly match your creative vision.

Palette Toggle (D): Show or hide the palette with a single tap for a clutter-free canvas or to quickly access a variety of hues.

Palette Switch (1 - 9): Instantly switch between different palettes to explore diverse colour themes and find the perfect tones for any project.

Transparency & Palettes Select for Overlay Sketching

- **Transparency Mode (A)** – Make the canvas transparent, allowing you to draw directly over your desktop. Add notes on top of other applications, highlight diagrams, or brainstorm on any background!

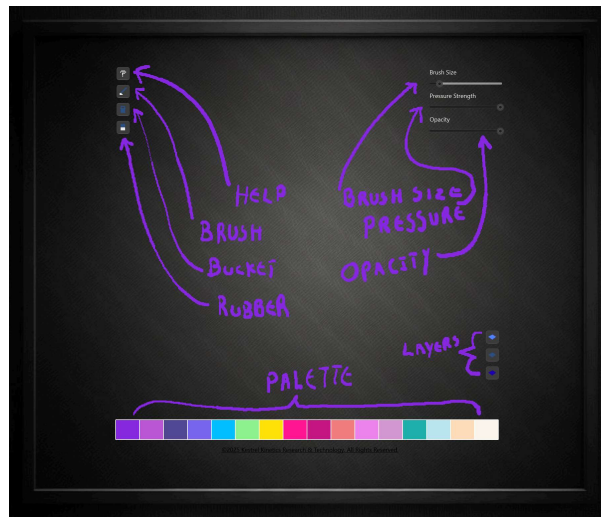

Work Modes to Maximise Your Canvas

- **Full-Screen Mode (F)** – Go full-screen to immerse yourself in a distraction-free workspace.
- **Frameless Mode (G)** – Maximise screen space and eliminate borders for a seamless drawing experience.

Capture Your Masterpiece

- **Screenshot (S)** – Snap a screenshot anytime to capture your progress. Ideal for preserving notes, diagrams, or sketches just as you created them!

Ready to Sketch, Annotate, and Create Anywhere?

Milenko Sketch gives you a flexible, creative canvas right on your desktop – whether you're making digital art or adding notes over other windows. For the latest updates, visit [Kestrel Kinetics Research & Technology](https://www.kestrelkinetics.com/).

Happy sketching! 🎨
